Document Export Details

- Title: Incident Closure Report INC-2841 (Lekki Phase 1 Fiber Cut)
- Document Code: ICR-INC2841-20260430
- Closed by: Oluwaseun Adeyemi
- Verified by: Amaka Obi
- Closure Date: April 30, 2026 at 17:42 WAT
- File Format: PDF
- File Name: ICR-INC2841-20260430.pdf

Contents Included in the PDF

- Incident Summary P1 severity, 50-minute duration, 14,200 subscribers impacted, no SLA penalty.
- Chronological Resolution Log detailed timeline from alarm at 16:48 to closure at 17:42.
- Root Cause Confirmed fiber cable TG-LEK-A severed at junction LJ-7 by civil contractor under LASG permit.
- Resolution Confirmed splice repair completed by Chukwuemeka Eze, OTDR passed, packet loss <1%.
- SLA Assessment MTTR 50 minutes, within 60-min SLA threshold, no penalty triggered.
- Subscriber Complaints 47 logged via customer care, all closed after restoration.
- Contributing Factors lack of notification from LASG regarding civil works in backhaul corridor.
- Preventive Actions Raised

- Complaint to LASG (Amaka Obi, due May 7)
- Marker posts installation at LJ-7 (Chukwuemeka Eze, due May 10)
- Failover route assessment TG-LEK-B (Ibrahim Musa, due May 14)
- Lessons Learned stronger coordination with LASG required; quarterly validation of failover routes.
- Closure Sign-off signed by Oluwaseun Adeyemi and verified by Amaka Obi.

Next Steps

You can now download the PDF file from the card above and circulate it internally for operational review or archive it for compliance records.

Would you like me to also prepare a monthly incident closure summary in Excel format, so you can track MTTR and SLA compliance across all April 2026 incidents?
